

Campaign Save energy

DAILY ENERGY CONSERVATION TIPS

- Energy saved is energy produced.
- Switch of the light and electrical gadget when not required.
- Switch off main Switch of electronic devices, when you are not using TV, Computer etc.
- Use CFL instead of GLS lamps and lights fixtures dust free.
- Use day light as far as possible in office and house.
- Paint the inner walls and ceiling with faint colors in your house.
- Defrost the refrigerators regularly and do not open the door frequently.
- Prefer fan and AC at room temperature as it consumes 15 times more energy and if used keep the temp at 25 Degrees and keep the door and window closed.
- Use electronic chokes instead of ordinary choke in tube lights.
- Use renewable sources of energy devices based on solar, wind Biogas whenever possible.
- Avoid switching lights on and off regularly as it affects the life span of bulbs.
- Shading of windows and wall can save up to 40% of AC load.
- Always remember 3 “R” for Sustainable Development – Reduce, Recycle and Reuse.
- Discourage the use of decorative lighting.
- Make maximum use of sunlight and Solar water heating system.
- Use ISI mark / BEE Star Rating electrical Appliances and carry out regular maintenance.
- Use maximum solar and alternative energy.
