

Food conservation Campaign

By Priya

Lac of tons of food is wasted in parties, marriages, homes and social gatherings in the world every year. There is an estimate that 20% food is wasted in every parties and thrown in to the garbage. On the other hand people in many parts of world are dying without food. This is a grave situation. We have a little care for food conservation. We should have a check on this system to avoid wastage waste of food. We should order food according the consumption/ requirement only to avoid wastage. Conservation and preservation of food is the need of the hour. Creation of awareness to save food among the masses is only solution for such wastage. NGOs and volunteers should come forward to collect balance food items from parties,homes, hotels and to provide it to the hunger and downtrodden in the community dying without food. Print and Media can also play an part to create awareness among the masses. Govt. should also take all steps to avoid wastage of food right from production to distribution of food.

It is our responsibility to use food items according to our requirement only, to stop wastage of food. Children and students should be taught the importance of Food. It is the moral responsibility of the family and the school to teach the importance of Food to avoid wastage of food. This strategy will also help to achieve the MGD goals in the poor countries where people are dying without food. Let us take pledge to save food.

We must remember food saved is food produced.
