“Girls...the backbone of the family...builder of the family and nation. ”
-Priya Verma, 18,India

3 Poems by Priya Verma

Climate Change

Change is not always better
Today is a patchy
Gray sky day
Which changes
The complexion
And mood of the sea below
Helpless I am
To witness
Natural perpetual
Destructions.
I grew up with
Woods all around us
I watched the
Plants and trees change
According to the
Changing season
Change in environment
Could be disastrous
To life, environment and Earth.
It is the human act
Thoughtless actions
Responsible for global warming
Time to awake and pledge
To save the planet
For further destructions.

Water the ultimate boon

Water is indispensable
to life
it is considered
second only to oxygen
in terms of its
importance to body
this magical drink
has zero calories
quenches thirst
and delays bouts
of hunger
water performs
very important roles
as cooling agent, lubricant
a solvent and also a
medium of transportation
no wonder it is a
requisite for maintaining
good health
it is a boon to life on Earth.

GIRLS the gift of God

Girls are wonderful
Gift of God
They are the best
Creation of God
They are caring
Loving and
Backbone of the family
They are the best
Symbol of womanhood
They play
Important roles
Like sister, mother,
Daughter, wife and
The builder of the
Family and nation.
