

APPEAL

SAVE WATER

We waste water mercilessly during our daily use

Useful Water Saving Tips

Adopt it and Save Maximum Water

EVERY DROPS COUNTS

- Do take short showers and save 5 to 7 gallons a minute.
- Do fill the tub halfway and save 10 to 15 gallons
- Do install water saving toilets, showerheads and taps
- Don't run the water while shaving, washing your hands or brushing your teeth. Taps use 2 to 3 gallons a minute
- Don't flush toilet unnecessarily.
- Do repair leaky taps off tightly. A slow drip of water wastes 15 to 20 gallons each day.
- Do run the dishwasher and washing machine only when full. Save even more by using the short cycle.
- Don't let the water run while washing dishes. Kitchen taps use 2 to 3 gallons a minute. Filling a basin only 10 gallons to wash and rinse.
- Do use a self closing nozzle on your hose.
- Don't water your sidewalk or driveway- instead, sweep them clean.
- Don't over water your lawn or plants
- Do wash your car with a sponge and bucket rather than a hose.

Contribute towards water conservation.
